Career Objective

Motivated BCA student with knowledge of Python, SQL, HTML, and CSS, seeking opportunities as a Python Developer or Data Analyst. Eager to apply programming and analytical skills to solve real-world problems while learning and growing in a professional environment.

Technical Skills

- Languages: Python (primary), C++, C
- Database: SQL
- Web Technologies: HTML and CSS
- Tools: MS Office (Excel, Word, PowerPoint)

Projects

Video Hand Gesture Controller

Technologies: Python, Arduino UNO, Ultrasonic Sensor

- Developed a system to detect and interpret hand gestures to control video playback.
- Processed distance signals with Python, interfaced with Arduino for accurate real-time control.
- Enhanced usability of video control systems and reduced manual intervention.

Traffic and Accident Zone Analysis

Technologies: Python (Pandas, Matplotlib), Folium, Excel

- Collected and analyzed traffic accident data including date, time, location, severity, and vehicle type.
- Identified accident hotspots by geographic coordinates using Python and visualized them on an interactive map with Folium.
- Generated bar charts to show accident distribution by severity and vehicle type.
- Provided actionable insights on accident-prone zones to help improve traffic safety.

Education

Bachelor of Computer Applications (BCA) Uttaranchal University, Dehradun Pursuing – 2nd Year	(2023 – 2026)
Senior Secondary (12th), Science Stream Navyug Public School, Kotdwar, Uttarakhand CBSE Board	(April, 2021 – July, 2022)
Secondary Education (10th Standard) Navyug Public School, Kotdwar, Uttarakhand CBSE Board	(April, 2019 – July, 2020)

Certificates

- **Complete 2025 python Bootcamp: Learn Python Form Scratch**
Duration: 125 Hours | [Udemy]
Covered python basics to advanced topics. Built real-world Projects and developed a strong foundation in Python Programming.
- **Basic Computer Applications (MS Word, Excel, PowerPoint)**
Duration: 3 Months | [Ambey Computers]
Learned fundamental computer skills including document creation (Word), data handling (Excel), and presentations (PowerPoint).
- **C++ Programming**
Duration: 3 Months | [Ambey Computers]
Covered advanced C++ topics like Object-Oriented Programming, STL, file handling, and data structures.
- **Workshop on AI & Machine Learning with Data Science**
Organized by: IIT Roorkee | [2025]
Attended a foundational workshop on AI, Machine Learning, and Data Science. Covered data preprocessing, basic ML algorithms, and real-world applications.

Strengths

- Quick learner
- Strong understanding of logic building and debugging
- Team player
- Good communication skills

Languages

- English
- Hindi

Hobbies

- Video Editing
- Playing Football
